PROFILE SUMMARY

BCA graduate with a solid foundation in Python, web development, and data analytics. Completed virtual internships with J.P. Morgan and Deloitte, building practical skills in backend development, REST APIs, and data-driven problem solving. Eager to contribute as a fresher in a growth-oriented software development role.

TECHNICAL SKILLS

Languages:	Python, Java (Basics)	Web & Backend:	HTML, CSS, Django, REST APIs
Databases:	MySQL, Oracle 11g	Data / ML:	Pandas, NumPy, Matplotlib, Scikit-learn
Tools:	VS Code, Jupyter Notebook, Git, Linux CLI	Concepts:	OOP, Machine Learning, Data Analysis, Backend Architecture

EDUCATION

Bachelor of Computer Applications (BCA)	2023 – 2026
Srimad Andavan Arts and Science College, Trichy Aggregate: 83%	

CERTIFICATIONS

- Oracle Database 11g & Linux Fundamentals – Aimore Technologies
- Python for Data Science, AI & Development – Coursera (IBM)
- TCS iON Career Edge – Young Professional Certification – Tata Consultancy Services

INTERNSHIP EXPERIENCE

Software Engineering Virtual Internship – J.P. Morgan (Forage)	2024
- Configured development environments and integrated backend systems for simulated fintech applications. - Designed message-queue architecture, relational database schemas, and RESTful APIs; gained exposure to enterprise software design patterns.	
Machine Learning & Predictive Analytics Internship	2024
- Applied Pandas and NumPy to clean and analyse real-world datasets; built and evaluated a Linear Regression model for predictive analysis. - Produced data visualisations using Matplotlib to effectively communicate insights to stakeholders.	
Data Analytics Virtual Internship – Deloitte (Forage)	2024
- Analysed large business datasets to surface actionable insights supporting executive decision-making. - Cleaned and transformed raw datasets; built interactive dashboards simulating real client deliverables.	

PROJECTS

Smart Jewellery E-Commerce System with AI-Based Recommendations

[Django](#) · [Python](#) · [Machine Learning](#) · [MySQL](#)

- Developed a full-stack Django e-commerce platform with product browsing, order placement, inventory management, and secure user authentication.
- Integrated an ML-based recommendation engine for personalised product suggestions and a regression model for wastage prediction.
- Implemented role-based access control, end-to-end order processing, and efficient database management with thorough testing.
